The Satisfaction of a Perfect Lawn

A fine lawn is obtained by the careful and exact fulfillment of three fundamental requirements. Careful preparation of the seed bed, the use of good grass seed and the proper maintenance of the turf once established. These three factors are of equal importance, and failure to meet any one of these requirements will make the efforts expended of little avail. Burnett Bros. Inc., with a reputation of supplying grass seeds of the highest quality for a period of over 45 years, assume the responsibility of guaranteeing good seed.

Sow Killarney LAWN SEED and Walk on Velvet

Killarney is an up-to-date quality Lawn Seed Mixture composed of the finest imported and domestic grasses especially adapted for lawns in the northern United States. It is a mixture of the permanent, sod-forming grasses Kentucky Blue, Chewings Fescue and Bent carefully blended with a small percentage of the quick growing, essential nurse grasses. Under favorable conditions, Killarney will be at its prime during the second season of its growth having produced a deep-rooted, luxuriant, velvet turf that should last for years.

Merion BLUE GRASS FORMULA

Our very newest and finest Lawn Seed mixture containing the sensational new Merion Blue Grass (B-27). Combined with Colonial Bent and Creeping Red Fescue, this formula produces a thicker turf that stays green all Summer and stands close mowing. This mixture does not grow quickly but once established will last indefinitely and thrives under a wide range of conditions. One pound covers three times as much as regular Lawn mixtures, thus making it no more expensive to sow an equal acree. to sow an equal area.

SOIL-SOAKER HOSE

The new "seepage irrigation" method that soaks the soil thoroughly like an "all night rain." Porous canvas treated to resist mildew. Screws to faucet or water hose, replacing sprinkler, and is closed at far end. 18 ft. \$2.95, 30 ft. \$4.35, 50 ft. \$6.95 (postpaid).

KRILIUM Miracle Soil-Conditioner

A new chemical that improves the condition of soggy, poorly drained soils, also dry sandy soils. Conditions all hard packed soil areas into a permanently loose and friable state.

Merloam Formula. 1 lb. size treats 100 sq. ft. 3 inches deep, or 600 sq. ft. ½ inch deep, \$1.75; 5 lb. size \$6.95.

Loamaker Formula. A 100% concentrate for large areas. Treats 5 times the area of Merloam Formula. 10 lbs. \$34.50, 25 lbs. \$84.50, 50 lbs. \$166.25. (Complete circular on Krilium free on request.)

Shady Place Lawn Seed Mixture

F Shady Place is a well balanced mixture of Fescue, Poa Trivialis, Kentucky Blue and Red Top. This formula makes it perfectly adaptable to fully or partly shaded areas. Soil under trees is in most cases impoverished and grass roots have to compete for food with the tree roots themselves. It is therefore wise to fertilize liberally in early Spring and early Fall to keep the turf growing and in good condition. If the soil is found to be too acid through lack of sunlight and dampness, add lime and loosen the soil well before seeding. Our "Shady Place" tormula contains 65% Permanent Lawn Grasses. Lb. \$1.60, 2½ lbs. \$3.75, 5 lbs. \$7.5, 12½ lbs. \$17.60, 25 lbs. \$34.25, 50 lbs. \$66.50.

LAWN SPRINKLER

Multiple Sprinkler. A movable and flexible sprinkler system. Slight, quick adjustment of the sprinkler head gives equal water distribution from each sprinkler. Brass body, head, swivel and caps. Guaranteed to lie flat. (Illustrated.) Set of 4 Sprinklers......\$7.50 postpaid For other Sprinklers see page 60

PERMANENT TURF

A superb quality, all-purpose formula that will produce the finest and most permanent lawn possible. In sun or shade—good or poor soil. Prepared especially for Chinch Bug infested areas.

Many beautiful lawns throughout certain areas of the eastern coast of the United States and elsewhere have been completely destroyed as a result of the extensive ravages of a recent lawn pest, the Chinch Bug. This bug is of the sucking insect type and does its damage to lawns by piercing the grass blades and shoots near the soil level and sucking out the juices of the grass.

Certain grasses have been found to be highly resistant to the attacks of this insect and it is a careful blending of these grasses that make up our "Permanent Turt," containing 70% Permanent Lawn Grasses.

Such lawn grasses as **Redtop** and **Bents** which are subject to the ravages of the Chinch Bug are not included in this mixture.

Permanent Turf (no Clover). 2½ lbs. \$4.25, 5 lbs. \$8.25, 12½ lbs. \$20.00, 25 lbs. \$39.00, 50 lbs. \$75.00.

Lawn Grass Seed Mixtures

Burnett's HAY and PASTURE Mixtures

Our Permanent Pasture Hay and Meadow Mixtures are composed of varieties of grasses best adapted for producing an abundant and nutritious food for stock. Nothing but the best recleaned seeds are used, consequently it does not take so large a quantity per acre as that generally used when poor quality mixtures are sown. We recommend 50 to 75 lbs. to lacre, which may be sown either in Spring or Fall.

MIXTURE NO. 1. For good soils, well drained and of medium texture. MIXTURE NO. 2. For poor quality soils, thin and generally dry.

MIXTURE NO. 3. For moist soils, comparatively rich in plant food and humus. Usually heavy in texture.

MIXTURE NO. 4. For shaded woodlands, fields and orchards.

MIXTURE NO. 5. Entirely composed of permanent HAY grasses for the production of a bumper hay crop.

MIXTURE NO. 6. A formula consisting of purely permanent Pasture grasses which furnish abundant and continuous grazing.

MIXTURE NO. 7. Hay and pasture grasses with Wild White Clover. 25 lbs. \$27.00, 100 lbs. \$98.00.

MIXTURE NO. 8. Timothy-Red Top-Clover mixture. Excellent for pastures and low cost hay production. 10 lbs. \$7.50, 100 lbs. \$70.00. MIXTURE NO. 9. Mixed Clovers only. For permanent pastures. 25 lbs. \$26.00, 100 lbs. \$95.00.

Note—When seeding with Nos. 1, 2, 3 and 4, the addition of 10 lbs. of Mixed Clover (No. 9) per acre sown separately, is advisable

Any of the above mixtures, unless noted: 25 lbs. \$25.00, 100 lbs. \$90.00, 500 lbs. \$425.00

CLOVERS Recleaned and of the highest germination

Weight per bushel of all Clovers, is 60 lbs.

Atlantic Alfalfa (Certified). Newest and finest strain offered for growing in our Northeastern states. It is very hardy, long-lived, highly resistant to bacterial wilt, and an enormous yielder. Quantity per acre, 15-20 lbs. Lb. \$1.95, 10 lbs. \$18.75, 60 lbs. (bushel) \$105.00.

STRAWBERRY PLANTS-GROWN

Strawberry Plants are not difficult to grow and readily adapt themselves to a great variety of soils and climates. Pot-grown plants can be set out in the field at any time during the Spring or late Summer and early Fall months, as their strong, fibrous roots take hold quickly in new location, and can be depended upon to produce bigger crops of larger berries than field-grown layer plants.

A careful selection of varieties will insure fresh berries in the garden from early June until late Fall. This can be accomplished by choosing an early, a midseason and a late fruiting type as indicated in description of varieties listed below. We recommend planting no less than 25 plants of a variety as we know from experience that growing fewer plants does not give a satisfactory picking for a small family. **Book your order NOW.**SHIPPING SEASONS—April 1st to May 15th and August

1st to October 15th.

NOTE—Our plants are taken from growing frames, knocked out of pots, individually wrapped, packed in wooden boxes, and shipped by express. (Although not recommended, small lots can be shipped Parcel Post if necessary.)

PREPARATION OF SOIL

Dig bed for your plants to a depth of 14 inches and incorporate well rotted manure (not fresh manure) or decomposed leaves with the soil. Afterwards scatter Bonemeal on each bed, raking it well into the

PLANTING INSTRUCTIONS

When plants arrive, unpack at once and place in a shady spot, sprinkling them lightly with water. After hot sun has gone down in early evening, dip each root ball in a pail of water and loosen the soil with the fingers. Be careful not to knock soil from the roots. When planting, set the plants 1 foot apart in the row, spacing the rows 2 feet apart. Plants need a minimum of 6 hours sun a day so do not plant in very shaded location.

RULES FOR SUCCESS

Most important rule is to keep weeds down by cultivating which will also loosen the soil, preserve moisture and induce healthy growth. If good, clean salt hay is available it is advisable to mulch the entire bed about the time green berries are forming, working hay well under the leaves. This practice keeps down weeds during fruiting season, keeps berries clean and free from rot and preserves soil moisture. In early Winter mulch the beds with a light covering of coarse manure, evergreen boughs, salt hay or similar material.

BURNETT'S BEAUTIFUL ASTERS

The introduction of a Wilt-resistant strain of Asters of recent years has helped tremendously in restoring this beautiful flower to popular favor as a garden plant. Up until the time of the origination of this resistant strain, garden enthusiasts were becoming discouraged trying to grow Asters outdoors with the wilt-disease so prevalent. The appearance of this new strain has again awakened interest in the culture of Asters.

For best results the ground cannot be too richly prepared. Plants from seed sown in the open ground in May will bloom in September and October. For July and August flowers, sow in March or April in cold frames or hotbeds. We especially recommend the following as being the best for cutting and general garden use.

GIANTS OF CALIFORNIA Non-Resistant

This class of Asters has now been discontinued in favor of the Wilt-Resistant Super Giants and Early Giant Asters.

GIANT SPENCER SWEET PEAS

Sweet Peas are and always have been one of our floral specialties. As climbing vines for trellises, or as an individual row across the garden, they make a wonderful showing. Every year our lists of varieties are revised to include the best type of each color, newer varieties supplanting those of less merit.

The following selection comprises the most popular varieties in their respective colors:

NEW CUTHBERTSON STRAIN

An outstanding new class of Sweet Peas that bloom later than Winter Flowering and earlier than the Summer Flowering varieties. Exceptionally strong growing plants that are noticeably more resistant to high Summer temperatures than any other class of Sweet Peas. The trench should be filled up with a rich compost of well-rotted manure and loam. Set roots 12 inches apart in the rows, allowing 2 to 3 feet between rows, spreading out and separating the roots carefully so that the crown will be covered with about 6 inches of soil. In November, when the stalks have been cleared away, give the bed a good top-dressing. In early Spring a liberal application of agricultural salt will be liberal application of agricultural salt will be beneficial.

GARDEN PEAS

2 pounds will plant about 100 feet of drill

Peas do best in a light, rich soil; for private use sow in double rows 6 to 8 inches apart, the rows 2 to 4 feet apart, the tall ones requiring brush. Commence sowing the extra early varieties as soon as the ground can be worked in March; continue for a succession every two weeks until June. A good crop can be secured by sowing the extra early sorts in August for Fall use. The wrinkled varieties are not as hardy as the small round sorts, and if planted early should have a dry soil, or they are liable to rot in the ground; they are, however, the sweetest and best flavored.

New! BURNETT'S PERENNIALS Versatile!

OUR OWN INTRODUCTIONS and **SELECTED FAVORITES**

Our perennial plants are all strong, field-grown or potted stock. They are vigorous, young plants that will readily establish themselves permanently in your garden. Do not buy perennial plants by size alone. Large, old clumps are never satisfactory and will soon die out when transplanted. Plants are not sold in any quantities less than those priced. 5 plants of any one variety are sold at the 10 rate. Take

advantage of this saving over the smaller quantities less than those priced. It is plants of any one variety are sold at the To face. Take advantage of this saving over the smaller quantities.

*Cultural Hints**—Never plant Hardy Perennials too deep, and as a rule they prefer a well-drained, loamy soil that is neutral or slightly alkaline. Poor soil should be well prepared beforehand by digging in well-rotted manure with bonemeal added if possible. When fertilizing make sure no commercial fertilizers ever come in direct contact with plant as this will burn young roots and lower foliage. Keep weeds down

and soil loose around plants by frequent cultivation.

Our Terms of Sale . . . Please Read Carefully

FREE DELIVERY WHEN CASH ACCOMPANIES ORDER—
We deliver all Flower Seeds, Vegetable Seeds (except Potatoes and Farm Seeds), Grass Seeds, Bulbs, and Books free to any point in the United States at prices listed in this catalogue, reserving the right to choose the method of transportation. Purchaser pays transportation on Insecticides, Tools, Fertilizers, Garden Supplies, Roots and Plants. Small packages generally go by Parcel Post, and heavy shipments by express or freight.

CHARGE ACCOUNTS—We are pleased to open charge accounts for our customers upon receiving satisfactory credit

PRICES—Our prices are Net with no discount and are subject to change without notice and stock being unsold.

SHIPMENTS—Please check all packages when received as we sometimes enclose small packages in larger bags of seed. Look for them. Quite often it is not feasible to send all items ordered

at one time with the seeds; for instance, Onion Sets, Asparagus Roots, Rose Bushes, etc. Customers are notified of incomplete shipments or shortages the same day we make shipment. All seeds are packaged and labeled to conform with requirements of New York and Federal seed laws.

NON-WARRANTY—We give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bubbs, or plants we sell, and will not be in any way responsible for the crops. Our liability in all instances is limited to the purchase price of the seed. Every order is accepted on these conditions only. All claims must be made within 10 days of receipt of goods.

Price fluctuations, Government established prices, crop failures, and other factors beyond our control make it necessary for us to reserve the right to change any price in this catalogue if conditions warrant it.
